

IN THE CLAIMS

Please substitute the correctly numbered claims 54-76 for claims 53-75 submitted in the Preliminary Amendment concurrently filed with the instant application:

~~54.~~ A toner particle adapted for use in electrostatic image formation comprising:
a polymer; and
flakes of metal dispersed in the polymer.

Sub E
B1
55. A toner particle according to claim 54 wherein the flakes of metal have a dimension greater than about 4 micrometers.

56. A toner particle according to claim 55 wherein the flakes of metal have a dimension greater than 6 micrometers.

Sub E
57. A toner particle according to any of claims 54-56 wherein the metal flakes comprise gold.

58. A toner particle according to any of claims 54-56 wherein the metal flakes comprise silver.

59. A toner particle adapted for use in electrostatic image formation comprising:
a polymer; and
a particulate fluorescent material, dispersed in the polymer.

60. A toner particle according to claim 59 wherein fluorescent material is in the form of particles having a size greater than 2 micrometers.

Sub E
61. A toner particle according to any of claims 54-56 wherein the polymer is a low molecular weight ionomer.

(62.) A toner particle according to claim 57 wherein the polymer is a low molecular weight ionomer.

(63.) A toner particle according to claim 58 wherein the polymer is a low molecular weight ionomer.

64. A toner particle according to any of claims 59 or 60 wherein the polymer is a low molecular weight ionomer.

(65.) An electrified toner particle according to any of claims 54-56.

(66.) An electrified toner particle according to claim 57.

67. An electrified toner particle according to claim 58.

68. An electrified toner particle according to any of claims 59 or 60.

(69.) A liquid toner comprising:

a plurality of toner particles according to any one of claims 54-56; and
a carrier liquid.

(70.) A liquid toner comprising:

a plurality of toner particles according to claim 57; and
a carrier liquid.

(71.) A liquid toner comprising:

a plurality of toner particles according to claim 58; and
a carrier liquid.

72. A liquid toner comprising:

a plurality of toner particles according to any one of claims 59 or 60; and

a carrier liquid.

73. A printed image printed with a process utilizing a liquid toner according to claim 69.

74. A printed image printed with a process utilizing a liquid toner according to claim 70.

75. A printed image printed with a process utilizing a liquid toner according to claim 71.

76. A printed image printed with a process utilizing a liquid toner according to claim 72.---

REMARKS

By the present amendment claims 53-75 have been renumbered as claims 54-76 in accordance with the request in the Office Action. Accordingly, claims 54-76 are pending in the application and are subject to requirement for restriction.

RESTRICTION REQUIREMENT

The Examiner has required restriction to one of the following inventions under 35 U.S.C. 121:

I. Claims 54-58, 61-63, 65, 66, 69-71 and 73-76, drawn to a toner with a metal flake, classified in Class 430, subclass 106.

II. Claims 59, 60, 64, 67 and 72, drawn to a toner with a fluorescent material, classified in Class 430, subclass 111.
